Instructions:

Print out the mask on cardstock. Cut out the eye holes. Using a hole punch, punch holes where indicated on each side of the mask. Cut along the dotted line on the character's nose to create a vent. To secure the mask to your child's head, cut a piece of elastic string or elastic cord to the size of your child's head and tie it to the holes that you punched out. Adjust the length of the string so that the mask stays securely on your child's head.
